Amendments to Claims

- (Currently Amended) A composition consisting essentially of comprising a thermoplastic material containing fillers wherein said fillers comprise: (A) 1-20% by weight of graphite; (B) 4-30% by weight of a carbon fiber; and (C) 1-20% by weight of mica, said composition having a coefficient of friction of less than or equal to 0.20, wherein the weight percentages are based on the total weight of the composition, and wherein the thermoplastic material comprises at least 50 % by weight of the total composition.
- 2. (Withdrawn) A composition according to claim 1, further comprising (D) 0-15% by weight of a particulate polyimide.
- 3. (Withdrawn) A composition according to claim 2, wherein said thermoplastic material comprises 45–92 weight %.
- 4. (Withdrawn) A composition according to claim 3, wherein said thermoplastic material comprises preferably 50-86 weight %.
- 5. (Withdrawn) A composition according to claim 4, wherein said thermoplastic material comprises most preferably 65-70 weight %.
- (Currently amended) A composition according to claim 1-or 2, wherein said thermoplastic
 material comprises liquid crystalline polyesters (LCPs), polyimide or polyether ketone
 ketone (PEKK).
- 7. (Currently amended) A composition according to claim 1-or-3, wherein the carbon fiber is chopped having a length of about 1/3" (8.2mm).
- (Currently amended) A composition according to claim 7 Claim 1, wherein the carbon fiber is milled and has a mean-length of at least 150 micrometers.
- (Currently amended) An article made from a composition according to <u>Claim 1</u>-one of elaims 1-5.
- 10. (Previously Presented) An article made from a composition according to claim 6.
